

The Proficiency Cycle- Core Data Strategies Module 2 Overview

Topic: Proficiency in Progress: Performance-Based, Proficiency Driven Practices

Learning Objectives

I am learning:

- The differences between performance and proficiency.
- How performance and proficiency impact the growth in the proficiency of my learners.
- How to reflect on my practices and consider areas of personal growth and/ or practice.
- To plan for one action step I can take that will support performance-based practices and support the growth in proficiency of my learners.

Learning Activities

Overview-Introduction to the Module

This module will help participants to gain a deeper understanding of the differences in performance and proficiency and why this is so important to their practice as they set targets, provide practice, assess and give feedback.

Reflecting on Your Practice

Discussion & Reflection

- What are some ideas you learned about how to power up for proficiency in your instructional practice?
- What are some ideas you have for providing more opportunities for learners to practice and build skills that will grow their proficiency through strong performance?
- What do you want to learn more about?
